### Legend

- All PDT Disciplines

- Specialized Disciplines (Not TS-EE)

- TS-EE

U.S. Army Corps  
of Engineers  
Wilmington District

# Spatial Data Requirements

## Purpose:

- To maintain logical consistency and integrity of Geographic Information Systems (GIS) data
- Facilitate the construction of project Geodatabase (GDB)
- Enable sharing of data across disciplines
- Provide confidence in the spatial analysis performed by those disciplines

U.S. Army Corps  
of Engineers  
Wilmington District

# Spatial Data Requirements

- **Data Format**
- **Datum, Coordinate System, Units of Measure**
- **Database Content and Schema Guidelines**
- **Metadata**

U.S. Army Corps  
of Engineers  
Wilmington District

# Spatial Data Requirements

## Data Format:

ESRI ArcView/ArcInfo 9.0

- Personal GDB
- SDE/SQL Server GDB
- Shapefile
- DEM
- TIF/TFW
- JPG/JPW
- MrSid

U.S. Army Corps  
of Engineers  
Wilmington District

# Spatial Data Requirements

## Datum, Coordinate System, Units of Measure:

- Horizontal Datum = WGS 1984
- Coordinate System = Geographic
- Horizontal Units = Decimal Degrees
- Vertical Datum = NAVD 1988
- Vertical Units = Feet and Tenths of Feet

U.S. Army Corps  
of Engineers  
Wilmington District

# Spatial Data Requirements

## Database Content and Schema Guidelines (Vector Data):

- USACE project data will comply with the Spatial Data Standards for Facilities, Infrastructure, and Environment (SDSFIE) attribute structure and naming conventions
- Data produced and maintained by other Federal, State, and Local agencies may be retained and used in their native format

U.S. Army Corps  
of Engineers  
Wilmington District

# Spatial Data Requirements

## Metadata:

ESRI ArcView/ArcInfo 9.0

- Federal Geographic Data Committee (FGDC) compliant metadata
- Metadata of compiled data will be available online

U.S. Army Corps  
of Engineers  
Wilmington District

# Accessing The Data

## Access Levels:

- Level 2 Users will be PDT members that are USACE employees with GDB connections
- Level 1 Users will be all PDT members, both USACE and non-USACE through an Internet Map Service

U.S. Army Corps  
of Engineers  
Wilmington District

# Accessing The Data

## Level 2 Users:

- Direct USACE network connection to GDB
- Some write, some read only
- Firewall and Security issues prevent extending these privileges beyond DOD

U.S. Army Corps  
of Engineers  
Wilmington District

# Accessing The Data

## Level 1 Users:

- Internet Map Service Connection
- ArcIMS or WMS (TBD)
- Level 1 Users can investigate data through web browser, no GIS software required
- Level 1 Users can add IMS or WMS to own GIS Projects

U.S. Army Corps  
of Engineers  
Wilmington District

# Status

## Data Gathering Phase:

- ID Needed Data Layers – Initial Complete
- Create/Load GDB – SDE/SQL vector GDB created  
50% B-map layers collected, 35% loaded
- GDB /Level 2 Access – In Progress
- Create IMS/Level 1 Access – Test Completed
- Metadata Service – Under Review

U.S. Army Corps  
of Engineers  
Wilmington District
